Simplify Your Product Data Management

Are manual imports and data mapping slowing down your operations? Our Excel, XML, and CSV Table Matcher for Business Central eliminates these headaches, offering a seamless way to import and map product data.

The Ultimate Data Import Solution

Effortless Integration

Quickly import product data from XML, CSV, or Excel files into Microsoft Dynamics 365 Business Central without any hassle.

Smart Mapping

Customize mappings to suit your business needs, ensuring that data is organized exactly as you want it.

Enhanced Accuracy

Minimize errors with our alias functionality, which helps prevent spelling mistakes in product data.

Customizable Settings

Tailor import settings to your specifications, including file names and field selection, and filter data to get precisely what you need.

Transform your Workflow

Automate Tedious Tasks

Automate the data import process to save time and reduce manual errors.

Streamline Data Management

Efficiently manage your product data, allowing you to focus on strategic decisions rather than data entry.

Stay Updated

Keep your inventory up-to-date effortlessly, ensuring that new products are added seamlessly and data from various sources is synchronized without any fuss.

Ideal for Your Business

Perfect for small to medium-sized enterprises using Microsoft Dynamics 365 Business Central, our extension simplifies and enhances your product data management process.

What Makes Us Unique?

Our Excel, XML, and CSV Table Matcher stands out with its user-friendly interface, robust customization options, and reliable performance. It's designed to handle complex import tasks with ease, ensuring your data management is efficient and error-free.

Experience Seamless Data Management

Upgrade your product data management with our powerful extension. Download it today and transform the way you handle your product data.
