Efficient payment management with our Mollie Payment integration

Are manual payment processing and outdated payment links a challenge for your business?

With our specially developed Mollie QR-Code payment integration, you can simplify the creation and management of payment links in Dynamics 365 Business Central. Our tool saves time, reduces sources of error, and ensures your payment processing always runs smoothly and securely. Mollie's seamless integration allows you to generate payment links directly on your invoices and offers customers a quick and easy way to make payments by scanning a QR code

Features of the Mollie Payment Integration

QR-Code in billing sales invoice forms

The QR code is not automatically inserted into the posted sales invoice form. Instead, developers must manually create the QR code expression (`=Fields!QRCodeImage2.Value`) in an image field using an RDLC editor and thus integrate it into the layout of the posted sales invoice.

Flexible payment processing

Manage multiple Mollie payment methods and customize payment links to suit your needs.

Automatic invoice update

After a payment is made, the invoice status is automatically updated in Dynamics 365 Business Central so you always have an overview.

Your benefits at a glance

Time saving

Automated payment processing without manual entries.

Easy payment

Customers pay quickly and easily via QR code, without any additional effort

Error reduction

Automatic status updates minimize errors and queries.

Individual forwarding after payment

After payment, customers automatically land on a desired page – e.g. thank you page or customer portal.
